2026 REGULATORY CHANGES

Eight changes in 2026 that can affect your products

26 Jan 2026

Colombia · ANE

Resolution 28/2026 sets a new band plan for 896–915 MHz and 941–960 MHz, which are no longer reserved only for IMT mobile services.

Official source: mintic.gov.co

30 Jan 2026

Trinidad and Tobago · TATT

The new national frequency allocation table (version 4.0) updates the frequencies identified for class-licensed devices.

Official source: tatt.org.tt

22 Feb 2026

Chile · SUBTEL

Short-range devices now need a QR label that links to product information, instead of a certification letter. Medical devices are the exception.

Official source: subtel.gob.cl

25 Feb 2026

Bolivia · ATT

The list of equipment subject to homologation now includes IoT devices (LoRaWAN, RFID, SRD) and FM/AM receivers.

Official source: att.gob.bo

24 Jun 2026

Venezuela · CONATEL

CONATEL launched an online module to look up and download approval certificates, making it easier to prove compliance at customs.

Official source: conatel.gob.ve

Jul 2026

Paraguay · CONATEL

CONATEL is reviewing its 2009 homologation regulation to cover IoT, 5G NR and online filing.

Official source: conatel.gov.py

20 Aug 2026

Costa Rica · SUTEL

SUTEL accredited the first administrator of the AFC system that controls standard-power 6 GHz Wi-Fi devices (RCS-220-2026).

Official source: sutel.go.cr

25 Aug 2026

Panama · ASEP

ASEP temporarily suspended new applications for Direct-to-Cell satellite services (Res. AN 22018-Telco).

Good to know before your next launch

✓ Your CE or FCC reports are enough

No local testing or samples in 34 of 35 countries. Costa Rica requires local testing for cellular devices, and we coordinate it.

✓ Local representative included

We hold the certificate in each country at no extra charge, so you don't need an importer.

✓ Certificate validity varies

Most countries have no expiry. Venezuela: 1 year. Paraguay, Aruba, Trinidad and Tobago: 5 years. Bolivia, Cayman Islands, Saint Lucia: 10 years. Uruguay: 15 years.
